

Tokai Fine Edge, as thin as a blade.

Bespoke your lenses with "Fine Edge"
for the ultimate in lens thickness reduction.
Manufactured exclusively by Tokai.

Ideal for lenses with high negative power.

- Reduces the thickness of lenses with higher negative powers, making them more aesthetically pleasing.
- The reduction of thickness is achieved without compromising the visual field.
- The AR-coating on the "fine edged" surface protects and increases durability.

Fine Edge processing has 4 types

Type	Max	Special	Super	Natural	Standard processing
Characteristic	Makes the thickness of the edge as thin as possible.	Makes the thickness of the edge specially thinner.	Makes the thickness of the edge thinner.	Makes the thickness of the edge more natural.	Standard thickness.
